Robust CSI-2 based Alvium cameras with GMSL2 interface

Benefit from greater flexibility in cable lengths

Alvium GM2 STP cameras with GMSL2 (Gigabit Multimedia Serial Link) interface have been designed to overcome the limitations of standard CSI-2 cameras. The closed housing CSI-2 based cameras come with integrated serializer and a rugged HSD STP connector for cable lengths up to 8 meters. This connection can also be used to power cameras (Power over STP), enabling single cable solutions.

To operate Alvium GM2 cameras on your vision system, Allied Vision provides different access modes: - GenlCam for CSI-2 Access controls the camera by GenlCam features, using the Alvium CSI-2 driver and CSI-2 transport layer (TL) directly. All Alvium GM2 STP models with equivalent 1800 C models are supported. Please find FAQs and installation instructions in the Getting Started with GenlCam for CSI-2 application note. - Direct Register Access (DRA) to control the cameras via registers for advanced users. - Video4Linux2 Access allows to control the cameras via established V4L2 API and applications like GStreamer and OpenCV. Open-source CSI-2 drivers are available on GitHub for different boards and systems on chip (SoCs).

In addition to lens mount and housing options, see Customization and OEM Solutions webpage for additional options.
